

Machining & Tooling Solutions (C-MTS)

Our distribution network

embarks on a journey into precision engineering, where cutting-edge technologies unite in the creation of superior tooling and machining components.

From the complexities of stamping and mould tool techniques to advanced CNC machining and beyond, our commitment to excellence covers the entire manufacturing spectrum.

Capabilities encompass:

- High Precision CNC Machining
- High-precision Metal Turning Service
- EDM Wire Cutting
- EDM Sparking Erosion
- Heat treatment
- Coating Service
- Engraving
- Design Service
- Rapid Prototyping
- Precision Tube Bending
- Stainless Steel & Aluminum Polishing & Welding
- Laser Cutting and Punching

VERSATILE APPROACH ✓

HIGH QUALITY MATERIALS ✓

ADVANCED MACHINING TECHNIQUES ✓

ensuring each component embodies innovation and meticulous craftsmanship, resulting in unparalleled **quality.**

HIGH-GRADE MATERIALS

Tool Steel

Stainless Steel

Carbide

Ceramic

Brass

All grades of Plastics

Aluminium or Aluminium Alloy

Carbon Steel
